

Main distribution  
panel Feeder  
Breakers look like  
this.

One or more transfer  
switches may go  
between feeders and  
branch circuits.

Branch distribution  
panel in hallways or  
closet feed  
individual circuits  
like, lights and  
motors.

Transfer Switch  
Controllers

One transfer  
switches may go  
between the main  
breakers and feeders.

I have seen more than 10 transfer  
switches in one facility. You could  
have one or more on each floor.
